TITLE : PACK CONTAINING WATER
 PURIFYING ADSORBENT

ABSTRACT : PURPOSE: To simply purify water by using a pack constituted of small water- permeable bags contg. a porous adsorbent which is insoluble in water.

CONSTITUTION: A small bag 1 is constituted of paper, cloth, nonwoven fabric, etc., which is permeable to water and is not deformed, broken, nor collapsed by water or hot water. A small portion of porous adsorbent 2 such as active carbon, alumina powder, which is insoluble in water, is sealed in the small bag 1. It is cared that the adsorbent sealed in the inside of the small bag 1 is not leaked out of the small bag 1. When a pack A contg. the water-purifying adsorbent is thrown into water and allowed to stand for a while, malodor, bacteria, pathogenic bacteria, or livings which might perhaps be a pathogen, in the water are adsorbed to the adsorbent 2 and removed. Thus, purified water suitable for making nice tea is obt'd.
